

VIRTUAL PRODUCTION (VPRD)

VPRD 170 Survey of Virtual Production (5 Credits)

Virtual production is revolutionizing the art of filmmaking, by offering filmmakers unprecedented creative control. In this introduction to virtual production, students explore the evolution of contemporary, immersive filmmaking practices while navigating the intricacies of virtual production pipelines. Applying in-camera visual effects tools and techniques, students seamlessly blend the real with the virtual. This course propels students to proficiently manage digital assets, skillfully employ virtual production tools, and utilize real-time engines to successfully produce cinematic work.
